

### **First selection step**

Composition of the jury: One person from the research group does a first selection based on the following criteria:

- This selection must reduce the amount of abstracts to 20-30.
- This step can be skipped if the number of abstract received is approximately 30 or less.
- Each criteria (see below) is judged with: yes or no.
- All criteria must be accomplished to continue the review process.

#### Criteria for the first step

- 1) Formal aspects required for the submission
- 2) Internal consistency of the work. Agreement among objective, methods, results and conclusions
- 3) Relevance

### **Second selection step**

Composition of the jury: Two teachers from the research group (both practitioners and researchers, but if not at least one of each) and a student from the final year of the bachelor or from a master.

- This selection must reduce the amount of abstracts to 5.

Criteria for the second step

How do you think the abstract agrees with following sentences:

- 1) The topic of the abstract is relevant to physiotherapy and/or physiotherapy education

Completely disagree    0        1        2        3        4        5        Completely agree

- 2) The topic of the abstract is innovative for the profession in the clinical and/or research field

Completely disagree    0        1        2        3        4        5        Completely agree

- 3) The topic of the abstract is relevant in an international perspective

Completely disagree    0        1        2        3        4        5        Completely agree

**Final decision**

Composition of the jury: one teacher from the ENPHE-board, one from the research group and a student from the final year of the bachelor or from a master.

- This selection must order the abstracts in winner, second and third.

Criteria for the final decision

How do you think the abstract agrees with following sentences:

- 1) The topic of the abstract is relevant to physiotherapy and/or physiotherapy education

Completely disagree    0        1        2        3        4        5        Completely agree

- 2) The topic of the abstract is innovative for the profession in the clinical and/or research field

Completely disagree    0        1        2        3        4        5        Completely agree

- 3) The topic of the abstract is relevant in an international perspective

Completely disagree    0        1        2        3        4        5        Completely agree
